EDUCATION

DePaul University <i>Master of Science in Computer Science; GPA: 3.7</i>	Chicago, IL 2024 – 2026
Gujarat Technological University <i>Bachelor of Engineering in Computer Engineering; GPA: 3.2 (8.11/10)</i>	Ahmedabad, India 2021 – 2024
Gujarat Technological University <i>Diploma in Engineering in Computer Engineering; GPA: 3.7 (9.78/10)</i>	Ahmedabad, India 2018 - 2021

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML, CSS
Database: MySQL, Postgres SQL, XAMPP
Frameworks: Django, Bootstrap
Tools: VS Code, PyCharm, GitHub, Maven, Adobe

EXPERIENCE

Gujarat Technological University – Computer Lab Assistant (Part-time/Volunteer)	Ahmedabad, India 2020
- Assisted in maintaining computer labs by performing routine checks on desktops, projectors, and networking equipment. - Helped faculty and students troubleshoot issues with Windows and Linux systems during lectures and lab sessions. - Provided basic support for audio-visual setups, including microphones and display connections. - Logged recurring hardware/software issues and reported them to the department's technical staff for resolution.	
Arth Infosoft Pvt Ltd Software Engineering Intern	Ahmedabad, India 2024
- Developed HRConnect, a Django-based HR portal that streamlined leave management, attendance tracking, and event coordination, improving HR efficiency by 40%. - Designed and deployed features that enabled HR administrators to approve leave requests 60% faster, monitor attendance in real-time, and manage company events seamlessly. - Integrated PostgreSQL, ensuring secure, scalable, and efficient data storage for over 500 employees. - Implemented self-service functionalities, reducing manual HR workload by 30% through automation of leave applications and attendance logging. - Engineered a user-centric employee portal featuring self-service functionalities for leave applications and attendance logging, enhancing workplace satisfaction scores by 30% based on employee surveys.	

PROJECTS

Hot Properties – Real Estate Web Application Java, Spring Boot, Spring Security, Thymeleaf, MySQL, Hibernate, JPA, HTML, CSS, JWT
- Designed and developed a multi-role real estate platform enabling buyers to browse/filter listings, save favorites, and message agents; agents manage property listings; admins manage users. - Implemented secure authentication using Spring Security with JWT and enforced RBAC across views and backend services. - Built a dynamic front-end with Thymeleaf templates and Spring MVC controllers for property listings, user dashboards, and messaging. - Managed relational data using MySQL, Spring Data JPA, and Hibernate ORM for entities such as Users, Properties, Messages, and Favorites. - Created secure, RESTful backend services with exception handling, form validation, and error messages.
Stock Management System PHP, MySQL, HTML, CSS, XAMPP v3.30 (local web server)
- Designed and developed a Stock Management System using PHP and MySQL for efficient inventory tracking and management. - Contributed to the front-end development and prepared the project report as part of a four-member team. - Ensured a user-friendly interface using HTML and CSS for seamless navigation and interaction.

Slither Sprint | *Python, Object-Oriented Programming (OOP)*

- Developed a **modernized Snake game** using Python, incorporating **real-time score tracking and game state management**.
- Applied **OOP principles** to improve code modularity and efficiency, reducing redundant code by **40%**.
- Optimized gameplay mechanics, resulting in a **25% increase in player retention**.
- Built a structured and maintainable codebase to ensure scalability and facilitate future enhancements.
